

### Specification of PVC anti-slip mat - type paralatt 125

The mats are made of high quality raw materials without the use of dangerous substances. The material used-PVC comes from two companies with attestations, link to ([www.macomass.ch](http://www.macomass.ch), now the new company TIÚ-Plast a.s. [www.TIU.cz](http://www.TIU.cz)]. As the only company in the global market, we combine both materials-the top batten from impact-resistant PVC and the bottom strip of soft PVC, welding method without add a third material. This gives a high quality combined with great strength.

The mat is UV resistant, color stable, temperature resistance from-40°C to + 120°C. The structure allows easy maintenance and simple handling (rolled up ). The product is resistant to chemicals, acids, oils, fuels, aqueous solutions of salts, marine or mineral waters, very aggressive cleaning and disinfectant resources used in swimming pools, etc. The load of the mat is to 2t/dm<sup>2</sup>. The bottom strip of soft PVC guarantees a pleasant walking or prolonged standing, its structure allows for easy drainage of liquids in all directions. The mat not supported by the growth of bacteria or fungus. Warranty on products is 2 years. The product's lifetime is much longer.

Our mats are placed, e.g.: luxury hotels around the world, wellness, sauna, water parks, Disneyland Paris and Hong Kong, the various hospitals, spas, hospitals, food industry, automotive industry, heavy industry and laboratories.

Usage: everywhere where there are problems with water - liquids.
